KrishiCash

AI-Powered Cash Flow & Risk Oracle for Rural Micro-enterprises

Team KrishiCash · AI for Rural Finance Track

The Problem

- **87M+** rural households have no access to formal credit
- Banks reject them — **no CIBIL score, no formal records**
- Lenders face surprise NPAs from undetected hyper-local risks

₹1.2 lakh crore lost annually to rural NPAs in India

KrishiCash — Our Solution

KrishiCash predicts future cash flows using **satellite imagery, weather data & commodity prices** — enabling data-driven lending decisions without any formal credit history.

-  **Fast** — Real-time API-driven decisions
-  **Inclusive** — Zero formal credit history required
-  **Explainable** — Every score backed by transparent reasoning

How It Works

Data Signal	Source	What It Reveals
 Satellite NDVI	Google Earth Engine	Crop health & yield
 Rainfall Forecast	IMD / OpenWeather	Climate risk
 Commodity Price	eNAM / Agmarknet	Market risk
 Soil Moisture	ISRO Bhuvan	Ground stress
 Repayment History	MFI Data	Behavioural risk

Business Model & Impact

- **Customers:** MFIs, Regional Rural Banks, NBFCs
- **Revenue:** ₹15–₹50 per risk assessment (B2B SaaS API)
- **Lender ROI:** Reduce NPAs by an estimated **15–20%**
- **Social Impact:** 5M+ new rural borrowers reached by 2028

Roadmap

- **Phase 1 — Now:** Prototype dashboard & AI scoring model
- **Phase 2 — 6 months:** Live pilot with a regional MFI
- **Phase 3 — Year 1+:** Multi-state rollout & crop insurance

Thank You

Ready to revolutionize rural finance with AI.
