

KrishiCash

AI-Powered Cash Flow & Risk Oracle for Rural Micro-enterprises

Team: [Your Team Name]

NABARD Hackathon @ GFF 2026

The Core Problem

- **The Credit Gap:** 87M+ rural households lack access to formal credit.
- **Data Blindspots:** Traditional financial institutions cannot assess risk without CIBIL scores or formal financial histories.
- **The Result:**

Our Solution: KrishiCash

A **B2B predictive risk assessment platform** designed for MFIs, Regional Rural Banks, and NBFCs.

By synthesizing alternative, hyper-local data with basic transaction records, KrishiCash accurately forecasts future cash flows and generates dynamic risk scores.

- **Fast:** Real-time API-driven decisions.
- **Inclusive:** Requires zero traditional credit history.
- **Explainable:** Transparent AI that tells loan officers

Technology & Architecture

KrishiCash leverages modern AI and open data layers:

- **Alternative Data Feeds:**
 -  Satellite NDVI (Google Earth Engine) for crop health.
 -  OpenWeather/IMD for localized climate risk.
 -  eNAM/Agmarknet for live commodity pricing.

Business Model & Impact

- **Target Customers:** Microfinance Institutions (MFIs), Regional Rural Banks.
- **Revenue Model:** B2B SaaS / Pay-per-API-call (₹15–₹50 per assessment).
- **Value Proposition:**
 - Reduces NPAs by an estimated **15-20%**.

Future Roadmap

- **Phase 1 (Now - GFF 2026):** Prototype cash flow prediction model on historical open data with live dashboard.
- **Phase 2 (6 Months):** Live pilot integration with a regional MFI for real-world validation on 1,000+ borrowers.

Thank You

Ready to revolutionize rural finance.
